WWI / SIOP

April 3, 2013

(Reading Road to War (:) "7 Days in July" on WWI

WWI "could have 'been' not happened.

[When a small, "passable" change in timing
moderate
(force, context, "meaning" to them
or, correction of faulty (not carefully)
expectations, beliefs, fears, understandings of others)

would probably have made a great
difference in events — at least in ST
or, more significantly, making (& being) war

[re. "Plans are like strategies")

E.g. of decision on PP — if a month had
passed, & not...

Case & structural, other long events triggered
going further (like ERC; removal
(like WWII after WWI)

Certain people, plans, etc (structure)
made system prone to respond to triggering events
("unstable to...") ; high correlations (contingent)
probs. Response very depend on timing, context
(of a particular, particular trigger)

Secret, surprise FA are at root – triggering others' responses, which is "stable" to a first, surprise, FA !

(Army should not have got retaliation to Belgium – triggered resistance, when a FA might not have.

(Having weapons Hocks Resistance." & Alert blackmail

[My fear of blackmail

(K resented to it;

F. MA

(Berg; Skybolt; (C-I)

SU in Berlin 1948

deterrence (chain of events

My experience with C-3)

Evidence – A-bomb; H-bomb; Nuc winter

If Pearl, like other 6 knock-throws, had failed

Was if no trigger before 1915... (really!)

(What if: weak reality?)

System was cocktail (less from Curtis and don Fabian

see Hockstad – WWII

Stanley Hoffmann Harvard/MIT P.G. Salkogan (RJJM= Paul Hanley)

(Pan-SOP + ~~Anti~~SOP (viz. Korean Adm)
ignored effects on West Eur
+ East Eur and ...

Let alone: fair
trade — Foreign (and foreign
ops ~~and~~ & aid?

New Custom? (Refute?
Fr N)

1000 100 KT
1500
1500000,000 150 MT sm = how much sort

or 450,000,000 45 MT

Indiv-Pak = 1 MT (how much trade/sort)?

[Mis-reading of SU intentions, with
Warsaw Pact

Trigger: East Eur (not to take West Ger, & West Europe
uprising (overall) except as "vital, defense (of East Eur)
in ~~or~~ within East Eur or SU)
forces join in?" as in 1945-50?

(not: Hungary not on Berlin — except as vital
Poland ("too dangerous"
Czech or NVN — doctrines (any antitrust theme?!)
Berlin

Korea = WWI

4-3-13

Presidential (= SAC ; NATO FO)

Triggers: from
NK / China
Berlin
East Eur
C-III?
Turkey

China wars
(anti Taiwan (SO)
Cent America (SO)
to wars: China (FO)

Yet: no trigger yet seen
(May be detected!)
or, timing/context may be
powerful weapons (CS, FMA)

(K wanted Fight Berlin; Fight it Harvard (+ see Gilpatric)

VN — From all, of Civs:
C-II (thy don't understand need for Presidential, build mob.

"Better now than later."
(France; Russia (Korea?) (UK?)

TG; Pakistan

"Pearl Harbor" Call Rides; see Pearl Harbor drag down

Different: WWII fragile, shifting alliances
+ degree of uncertainty, time
Korea, timing important

Cargo cult strategies, plans: contingent plans

(Yet — all (?) knew Korea would go through Belgium

In C-II, both JFK & K were detained, by
one over

Neither was, enough,
or soon enough
to refrain from actions that provoked
and misread the risks.

Why did JFK invoke Type II, in warning K?
(and so did K) Both "committed" themselves
— in ignorance — to manifestly chancy
